

MARISA VUKAS

SUMMARY

Front-End Software Engineer with 6 months of experience in web development and fundamental knowledge of HTML, CSS, JavaScript, and React. Highly driven self-starter, enjoys working in a team environment, and eager to utilize my skills to make a major contribution at your business.

PROJECTS

Poblano's Grill Web App

GitHub: <https://github.com/marisavukas/poblanos>

Built with: React and Node.js.

- A fully responsive restaurant app made without a template to showcase my CSS abilities.
- Implemented useState React Hooks for food cart items and conditionally renders user input to show user selection.
- Implemented checkout page utilizing useEffect React Hook and stored cart items to local storage.

Website Portfolio App

GitHub: <https://github.com/marisavukas/react-bootstrap-portfolio>

Built with: React, Bootstrap, and Node.

- Utilized useState React Hook, allowing collapsing navigation bar.
- Implemented projects section, which allows users to view code via Github or view the live app hosted via Heroku.
- Additionally, I added a contact section of the app, which allows users to contact me through email.

Online Metronome App

GitHub: <https://github.com/marisavukas/metronome>

Built with: React, Tone.js, and Node.

- Responsive app made from scratch.
- Allows users to choose beats per minute and play and pause the app as desired.
- Utilizes Tone.js scheduleRepeat method to accurately count beats per minute when user drags the slider or clicks on one of the counter buttons.
- Implemented asynchronous functions with await keyword to ensure smooth transition for the play and pause of the metronome.

EDUCATION

Front-End Web Development Track

Treehouse Code

Relevant Courses: HTML, CSS, and JavaScript
