EXPERIENCE

Winthrop Capital Management, Remote — *Software Engineer*

JUNE 2025 - PRESENT

- Refactored a legacy desktop system into a modern web application, rebuilding core reporting functionality.
- Built new reporting features using C#, .NET, Entity Framework Core, and Angular, supporting complex data transformations.
- Improved performance and scalability by replacing tightly coupled legacy report logic with streamlined web-based reporting pipelines.

Baker Hill, Carmel, IN — Associate *Software Developer*

JANUARY 2024 - DECEMBER 2024

- Developed a multi-tenant SAAS loan origination software platform hosted in Microsoft Azure datacenters in the Fintech industry.
- Translated business needs to Azure DevOps Features, User Stories, Tasks with estimates, as part of an Agile SDLC.
- Constructed and developed Angular components for user data entry.
- Designed and delivered WebAPI endpoints as solutions for business requirements in a C#, n-tier architecture.
- Implemented Cypress end-to-end tests for a financial data entry workflow, reducing manual regression testing effort and increasing test coverage.
- Leveraged Azure cloud-native technology (Azure Tables, Blobs, Functions, etc.) for third-party API integrations.

Winthrop Capital Management, Carmel, IN — *Software Engineer*

SEPTEMBER 2023 - DECEMBER 2023

- Proficient in C# and .NET framework, with experience in Entity Framework for database interaction.
- Completed code refactoring tasks in an Agile software development environment.

Edify Labs, Fishers, IN — *Workflow Developer*

NOVEMBER 2022 - APRIL 2023

- Built and configured workflow automations leveraging internal APIs and databases.
- Acted as a technical resource within the team, providing support in resolving workflow-related challenges, including those involving APIs and databases.

d2index, Westminster, CO — *Software Engineer Intern*

JULY 2022 - NOVEMBER 2022

https://d2index.com/

- Engineered and launched 15+ interactive UI features using React.js and REST APIs supporting a data-driven investment platform.
- Prototyped a 3D NFT gallery using React Three Fiber.
- Developed cryptocurrency data visualization employing Chart.js and REST APIs.

PROJECTS

Personal Finance Tracker — *https://github.com/marisavukas/Finance-Tracker*

- A React/Node/Express web app built using the Plaid API to track expenses and budgets.

StarGPT Chrome Extension — *https://github.com/marisavukas/chat-gpt-extension*

- An extension that allows you to pin and retrieve ChatGPT conversations.

Online Metronome App — *https://github.com/marisavukas/metronome*

- Real-time metronome using React, Node,js and Tone.js library.

EDUCATION

Purdue University, West Lafayette, IN — *Bachelor of Science, Nutrition Science*

MAY 2020
